A PICTORIAL DIGEST OF THE BEST CALIFORNIA ARCHITECTURE

Copyright, 1926  
by  
JOHN C. BRASFIELD

## Foreword

*Ah to build, to build!  
That is the noblest art of all the arts.  
Painting and sculpture are but images,  
Are shadows cast by outward things  
On stone or canvas, having in themselves  
No separate existence. Architecture,  
Existing in itself, and not in seeming  
A something it is not, surpasses them  
As substance shadow.*

—LONGFELLOW.

Building materials like men, are judged by the character of their associates.

As the finer elements of nature attract the similar qualities of a man's soul and make of him a more noble figure in his sphere of life, so it is that the characteristics of a fine building material will attract the attention of the master of the art of construction; and through his vision will be blended with other materials, into the materialization of a complete structure, bespeaking the character of each integral part and its maker.

## TERRA COTTA--THE MATERIAL OF THE AGES

HANDED down through centuries the art of making Architectural Terra Cotta has reached today a degree of perfection unattained by any other building material. Together with lightness and strength it combines such important features as economical reproduction of delicate detail, an exceedingly large variety of glazes and finishes and an unexcelled permanence.

## *Ramona Roof Tile*

*Beauty • Versatility • Permanence*

TO A STEADILY increasing number of Architects and owners Ramona Tile is an assurance of unexcelled color variation and harmony, a tile economically applicable to any type of roof and one which for years will retain undimmed its original beauty.

## An Artistic Triumph

of decorative skill has been wrought in the new building of the Elks Club, San Francisco, by the Heinsbergen Decorating Company of San Francisco and Los Angeles.

The rich, mellow tones, in exquisite graduations, interpret the genial atmosphere of this Fraternity, and lend a luxurious, lingering charm to the Interior. The walls were coated with

***Examine This  
Miniature—***

This model contains complete electrical installations, many of them operating.

It is being exhibited in the San Francisco district until January first, and in the Los Angeles district after January first.

The Westinghouse electric gearless traction elevator motors in this model are similar to those used in many of the newer and larger buildings throughout the United States, including many prominent installations in California.

*Woman's Club of Beverly Hills — Beverly Hills, California.  
Gable and Wyant, Architects. Lighting Equipment of wrought  
iron designed and created by Forve-Pettebone Company to har-  
monize with architecture and decorative schemes.*

**T**HE LIGHTING EQUIPMENT of a building, regardless of the type or its cost, should be considered at the very outset. Planned lighting saves money. It is the harmonizing influence that makes a building more than an assemblage of separate rooms. It should be part of the architectural and decorative plan.

That architects appreciate intelligent and constructive co-operation in the designing, adapting and installation of Lighting Equipment is evidenced by the extensive clientele of the Forve-Pettebone Company among Pacific Coast Architects.

The entire resources and facilities of this pioneer organization of lighting specialists is at your disposal—designers, draftsmen, display rooms and service departments.

CALIFORNIA STUCCO perpetuates the genius of the romancing architect. It knows no geographical bounds in its interpretation of architectural influence. Its permanent coloring, precise texture and enduring quality allows the designer every liberty in specifying a finish, and simplifies the plasterer's problem in meeting that specification. That is why, from coast to coast, *California Stucco* is the ultimate choice wherever stucco is purchased on the basis of low cost per years of service instead of low cost per bag. To justify this confidence, The California Stucco Products Company constantly strives to improve its product and increase the demand for stucco yardage.

## *A Popular, Durable Building Unit*

STONE-TILE is constantly gaining in popularity among the leading architects for both large and small construction.

Being practical, economical and fire-proof, yet it lends itself to the influence of charm and beauty of architecture.

The durability of STONE-TILE construction was demonstrated beyond question in the Santa Barbara earthquake where STONE-TILE residences passed the test without damage.

## Enduring Beauty

OLOR every year is an increasingly important element in architectural designing. In Pacific Clay Face Brick, all tones and shades are accomplished by scientific mixing of clays—not by artificial coloring. Fierce heat then fixes these colors forever. Pacific Clay Face Brick have enduring beauty—rich harmonies of old gold, old rose and other hues which mellow and blend with added charm as years pass.

# RUUD HOT WATER HEATERS

*Assure your clients of continuous  
lasting service*

The architect who aims to give his clients a lasting, permanent, satisfactory service, looks into the details of the equipment he specifies to the end that RUUD finds its name in the specifications for most first-class buildings.

A RUUD meets every requirement demanded of a hot-water heater—it lasts—it is simple of operation—it is economical to operate—it requires no attention—it furnishes an ample supply of hot water all the time.

The RUUD is the standard by which all Hot Water Heaters are judged. It has been such a standard for nearly forty years and holds its supremacy through actual service tests and satisfactory results.

The architect who specifies RUUD is certain to become well and favorably known among those who wish and appreciate the best.

Assure your clients of comfort, good service and absence of trouble by specifying RUUD WATER HEATERS.

CRANE BEAUTY IN THE OPEN; CRANE QUALITY IN ALL HIDDEN FITTINGS

Architects had long been ready to plan more beautiful bathrooms. But distinctive materials and fixtures were necessary, and clients had to be educated to higher "bathroom standards."

Crane Co. met both needs. Not only did it supply a large variety of distinctive and beautiful fixtures, but it advertised nationally the value of the architects' service in bathroom planning. This publicity continues. It stresses the im-

portance of a sufficient budget and adequate space for luxurious comfort and beauty. Architects now tell us that its effects are very evident.

At any Crane Exhibit Room, you will find a display of these newer fixtures that have inspired many novel and interesting bathroom effects. Responsible plumbing contractors everywhere sell them. The range of prices is within reach of the building budgets of all clients.

*And Many Others*

ESTABLISHED IN 1889

**Z**EOLITE WATER SOFTENERS were introduced in the U. S. by The Permutit Company. For years our engineers developed and improved water softening methods until the highest efficiency was reached.

Now, after many months of work, they have added a new triumph to their long list of engineering achievements by creating for you the Permutit Single-Valve Softener.

This new water softener is better than any apparatus of its kind ever built. The experience gained from thousands of installations in all parts of the U. S. is embodied in its design, the best materials obtainable are used in its construction. It has been tried and tested under all conditions.

**Simplicity**, convenience and dependability have been aimed at and achieved. A single valve controls the operation of softening, washing and regenerating. You don't have to know how to operate this softener, the single valve does it for you you couldn't make a mistake if you tried!

**Convenience** in regenerating is something every householder desires, and in designing the Permutit Single-Valve Softener, this factor has been given much careful thought. The salt pot is located at a most convenient height from the floor, a filling funnel is part of each softener's equipment, and the single valve does the rest in a few minutes' time.

**Dependability**. You want completely softened water throughout your house day and night the year round, and you want to be able to forget all about your softener from one regeneration to the next. The Permutit Single-Valve Softener will give you exactly that kind of service, and it will deliver its high water softening capacity for many years without diminution.

**SOMETHING OF INTEREST TO YOU**

Dear Reader:

This book is NUMBER 1 of VOLUME VI of the 1926 editions of The ARCHITECTURAL DIGEST.

There is a new edition published every three months—containing entirely new material—pictures of the Best California Architecture.

A complete set of all editions of The ARCHITECTURAL DIGEST will give one a pictorial of California architecture that cannot be collated in any other manner.

In order to assure the continuity of the set, a single edition should not be missed. If you are a subscriber, you are receiving each edition. If you are not a subscriber, perhaps you are missing some.

We want you to become a subscriber today. The price of the FOUR NUMBERS, mailed to you as they are published, is only \$6.00.

However, if you will send us the name of the book dealer from whom you purchased this edition—together with a check for \$4.00, we will apply the price paid for this edition to your order and you will be entitled to THREE additional numbers, to be mailed direct to your address, as they are published.

But don't wait—do it today.

The ARCHITECTURAL DIGEST.

Linoleum—Rubber Tile—Cork Tile—Everlastic Tile—Carpets and Rugs

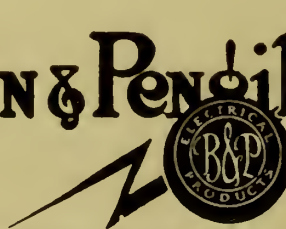

**Safe!**  
**for Homes**  
**DUPLEX PANEL BOARDS**

MORE and more architects are specifying Brown & Pengilly Duplex Panel Boards wherever a fused distribution center for local switch control is desired. They can depend on them being absolutely DEAD FRONT.

B. & P. products go into biggest buildings too—El Patio Ballroom, Barker Bros., Olympic Auditorium, Planters Hotel, Casa del Mar Club, Al Malaikah Temple, New Pacific Mutual and Pacific Finance Buildings, scores of the city's new schools, and a hundred others.

"A BEAUTIFUL ROOF FOREVER"  
OF BURNED CLAY TILE

**M**OST of us would be pretty glad to be able to start out in life with 38 years' experience. We could avoid many mistakes. Los Angeles Pressed Brick Company's 38 years have taught us many things that the builder should *not* do ... as well as many of the things he *should*.

This is the oldest and largest institution of its kind in the West. We have "grown up" with Los Angeles. We were Southern California pioneers in the use of roofing tile.

Architects and builders will find practical value in the advice and suggestions of our experts.

**38**

OF THE MANY GOOD REASONS WHY A STATIONARY VACUUM CLEANING SYSTEM SHOULD BE INSTALLED IN EVERY TYPE OF BUILDING—THE MOST OUTSTANDING ONE OF ALL, IS, THAT IT PROTECTS THE OCCUPANT'S HEALTH, BY EXHAUSTING THE FOUL AND DUST LADENED AIR OUT OF THE BUILDING AND NOT BACK INTO THE ROOMS DURING SWEEPING OPERATIONS.

*We Also Install the*

*Well Known*

**TUEC**

**SWIMMING-POOL  
CLEANERS**

SIMPLICITY OF CONSTRUCTION OF THE TUEC VACUUM CLEANER  
PRACTICALLY ELIMINATES ALL FUTURE REPAIRS
